PROFESSIONAL SUMMARY

Innovative Software Engineer with a robust background in full-stack development (Java, React, Node.js) and applied AI integrations (OpenAI, Gemini). Proven track record of architecting scalable backend systems, optimizing real-time data processing, and delivering secure applications. Adept at leading technical projects from conception to deployment within Agile, cross-functional teams.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), Swift (Programmatic UI)

Frameworks & Libraries: Spring Boot, Hibernate, React.js, React Native, Redux, Node.js

Cloud, DevOps & Tooling: AWS (EC2), Docker, Git, Linux, AI-Assisted Development (Cursor, Antigravity IDE), Jenkins

Databases & Infrastructure: MongoDB, MySQL, PostgreSQL, Elasticsearch, Supabase, Firebase

Core Concepts: Data Structures & Algorithms (DSA), OOP, CI/CD, Microservices, LLM API Integration

PROFESSIONAL EXPERIENCE

Langara College - Applied Research Centre (ARC)

Student Research Assistant

Sep 2025 - Present

Vancouver, Canada

- Spearheaded the technical design of the "Writing Lives" digital archive utilizing Vanilla JavaScript, **intentionally bypassing traditional CMS frameworks** to prioritize frontend flexibility and rapid development.
- Engineered a culturally sensitive UI/UX framework, **securing the digital preservation of historical data in compliance with strict ethical standards**, utilizing modern web protocols.

Unsoldly (B2B E-Commerce Platform)

Freelance Software Engineer

Jun 2025 - Jan 2026

Remote

- Engineered a full-stack B2B marketplace connecting electronic component vendors with local businesses, **facilitating bulk inventory discovery** utilizing React and Spring Boot.
- Architected a geolocation-based vendor discovery engine by integrating Elasticsearch, **enabling clients to rapidly filter and locate nearby suppliers** with minimal read latency.
- Engineered an automated Continuous Integration (CI) pipeline utilizing Jenkins, **ensuring high backend reliability** by executing JUnit and Mockito test suites prior to code merges.

SoluSoft Corporation

Junior Software Engineer

Nov 2023 - May 2024

Ahmedabad, India

- Engineered a Fraud Investigation platform, **reducing manual data entry time by 30%**, by automating email summaries and case reports utilizing OpenText and ChatGPT APIs.
- Optimized real-time data processing pipelines for enterprise clients, **handling high-volume transactions with minimal latency**, by building production-ready applications utilizing React.js and Spring Boot.

Unnati Informatics LLP

Java Developer Intern

Feb 2023 - May 2023

Ahmedabad, India

- Developed a full-stack Expense Manager, **enabling robust financial tracking for end-users**, utilizing Spring Boot (MVC) and MySQL.
- Protected sensitive financial data, **achieving zero unauthorized access incidents**, by implementing a secure authentication system utilizing JWT and cookies.

TECHNICAL PROJECTS

AURA | AI-Powered Creator Coaching Platform

Tech Stack: React Native, Redux, Node.js, MongoDB, Gemini API

Jan 2026 - Apr 2026

- Engineered a cross-platform mobile application utilizing React Native and Redux for predictable state management, **backed by a scalable MongoDB architecture** for reliable user data synchronization.
- Architected a private coaching environment, **delivering dynamic feedback on user presence**, by integrating Google's Gemini API and MediaPipe.

Bloom Up | AI-Powered Family Management Platform

Tech Stack: OpenAI API, Chart.js, Render, AWS

Sep 2025 - Nov 2025

- Architected backend infrastructure for a 10-person cross-functional team, **ensuring highly secure data handling**, by implementing JWT-based authorization.
- Streamlined deployment pipelines, **reducing manual hosting setup time**, by configuring automated backend hosting via Render and managing frontend availability utilizing Amazon EC2.

Beacon - Team SkyLine | Transit Reporting PWA

Tech Stack: Firebase, Supabase, JavaScript

Jan 2025 - March 2025

- Engineered a Progressive Web App (PWA) for real-time transit reporting, **implementing network-aware offline detection and fallback UI screens** to ensure a smooth user experience during connectivity drops.
- Architected a scalable, serverless backend, **achieving high-performance image storage**, utilizing Firebase for data syncing and Supabase.

EDUCATION

Langara College <i>PDD - Web & Mobile Application Development</i>	2024 - 2026 <i>Vancouver, BC</i>
Gujarat Technological University (GTU) <i>Bachelor's in Computer Engineering</i>	2019 - 2023 <i>Ahmedabad, India</i>
